

Skills & Tools

C#

- .NET Core 3.1
- .NET 5
- ASP .NET Core

MS SQL & PostgreSQL

Git, GitHub & Gitlab

Docker & Kubernetes

Experience

OZON

E-commerce, Russia

October 2021 – April 2022

During the 2nd year of study at Higher School of Economics, I did an internship at OZON.ru, a big Russian e-commerce company.

I worked in a team of software developers and analysts and participated in the development and maintenance of the back-end of the software used by Order Delivery Points (website & SQL database) using CI/CD practices.

The software I helped maintain and develop used the microservice architecture model and was programmed using C#'s .NET 5 Framework and utilized PostgreSQL (with C#'s EntityFramework) and MS SQL as its databases.

During the 6 months of internship, I regularly used Jira for task management and tools such as Graylog, Grafana and Jaeger for tracking bugs and assuring the stability of our services.

Developer

Education

Higher School of Economics

Faculty of Computer Science / Software Engineering
2020 – 2024

GPA

9.15 / 10

as of March 6, 2022

- Learned **C#** and **Java** programming languages, coded some basic applications for Desktop & Android
- Studied **Algorithms** and **Data structures**
- Studied **Algebra**, **Calculus**, **Probability Theory** and **Statistics**
- Taken a minor in **UX Design**

Interests

Science & Education

- Mathematics
- Computer science
- Linguistics
